

CHS Payment Solutions is a single source for all your merchant processing needs, including selling third-party gift cards.

What is the Gift Card Center?

The **Gift Card Center** provides your location with a gift card rack filled with the prepaid gift cards that consumers want. It offers you the ability to sell some of the most in-demand cards representing a wide variety of brands and categories, from wireless phones and gaming to restaurants and retail.

Drive additional store traffic and revenue with the perfect gift-giving solution, all while taking up minimal floor space! In addition, you will receive a commission from each card sold. Each type of gift card carries its own rate; the larger the card value, the higher the commission received. This service is completely FREE to setup and the gift card rack and terminal are also FREE* to lease.

Gift Card Center yields high margins, and it could easily become some of the most profitable square footage within your store. Your location will become the one-stop-shop for all your customers' gift card needs!

What are the benefits?

- Free, no-risk program.
- Additional store profits from commissions.
- Generates repeat business.
- Additional product offerings for your customers.
- Free restocking of gift cards.
- Transactions appear in your daily batch reports for easy accounting.

How does it work?

- 1 A customer selects a gift card for purchase.
- 2 The cashier receives payment for the purchase and then activates the gift card.
- 3 The transaction is entered in to the point of sale, a receipt prints, and the customer receives the gift card.
- 4 Commissions made on each sale will be paid to the merchant in one lump sum at the end of the month.

Card availability is subject to change.

**Free lease requires monthly activity.*
