

CHS Payment Solutions is a single source for all your merchant processing needs, including handling paper checks.

What is POS Check?

POS Check converts a personal check to an electronic transaction at the time of purchase. The check will be immediately returned to the customer at the end of the transaction; there is no paper to handle, process or forward to the bank. Every check is authorized online with a third-party to lower your check fraud loss.

This service is completely FREE to setup and the check reader is FREE* to lease. There are no hidden fees or extra percentages taken off the top. For each check transaction, you will incur a small set fee.

POS Check makes day-to-day operations faster and easier. It gives your customers the payment options they want and makes your back-office operations more streamlined. No more hassle with processing paper checks or paying various bank processing fees, those days are over!

What are the benefits?

- Lower paper check processing costs.
- Check authorization in real time.
- No more hassle with bounced checks at the bank.
- Authorization provides lower check fraud loss.
- Check guarantee up to \$100 to give you extra peace of mind.
- Additional security as paper checks are immediately returned to customers.
- Funds are deposited quickly with all other daily transactions and you will receive one consolidated statement.

3 Steps to a convenient electronic transaction!

- 1 A customer presents a paper check for payment.
- 2 The cashier scans it through the check reader, enters the purchase amount and any other required information.
- 3 Once the check is verified and approved, a sales receipt is printed for the customer to sign and the check is returned back to them.

**Free lease requires monthly activity.*
